

Waterproof Padlock - Steel, 43mm

STORE SKU
WBS002

Steel padlock with a PVC-covered body and shackle, for lockout points exposed to weather, washdown or extreme environmental conditions.

TECHNICAL DATA

- **Material:** PVC cover & steel shackle
- **Shackle diameter:** 6.2 mm
- **Body dimensions (L x W):** 41 mm x 48 mm
- **Keying:** keyed different, keyed alike, custom numbering available

APPLICATION

The 43 mm shackle gives more clearance than the 28 mm version for thicker hasps and larger fittings. A cap covers the keyhole against water and dust. The 6.2 mm shackle fits the 10.5 mm padlock holes on the steel safety hasp and the 7.5 mm holes on the clamp-on lockouts in this range. Body and shackle are steel beneath the PVC cover; the LOTO Padlock - Nylon - 38mm is the equivalent where an insulated padlock is specified.
